

## PHOTO MANIPULATION – SLIDESHOWS – 25 POINTS

There are multiple methods to create animated slideshows with software and Web 2.0 tools.

We will work with 3 Slideshow creation tools including:

Animoto [www.animoto.com](http://www.animoto.com)

PhotoPeach [www.photopeach.com](http://www.photopeach.com)

iPhoto Software on the Macs – iPhoto will let you do much more; however, our primary focus will be on creating a slideshow

For this assignment you will create a slideshow + add music & captions (for Animoto & Photopeach) with each of these tools in class. You will need to embed your final products on the “MovieMakers” page of the class wiki.

Each slideshow should have a minimum of 10 pictures.

In addition to the slideshows, manipulate a photo or image and embed to your personal wiki homepage or personal technology page.

Use Big Huge Lab <http://bighugelabs.com>

Text to Picture [www.txt2pic.com](http://www.txt2pic.com)

Image Generator <http://www.imagegenerator.com>

### Grading Criteria

	Points Possible	Points Earned
Animoto Slideshow with 10 pictures	7.5	
Photo Peach Slideshow with 10 pictures	7.5	
iPhoto Slideshow with 10 pictures	7.5	
Manipulated photo or image with Big Huge Lab, Text to Picture, or Image Generator	2.5	
<b>Total points</b>	<b>25</b>
